Fraport Pioneers Specialization Course for Chief of Airport Fire Service

Fraport Brasil - Porto Alegre to earn certification to teach courses to airport firefighters across the country.

Fraport Brasil - Porto Alegre held the first Specialization Course for Chief of Airport Fire Service (CBA-CE) from September 9 and 11.

With 22 class hours, the course included theoretical and practical lessons, group exercises, and assessments. Representatives of the National Civil Aviation Agency (Anac) participated in the course to audit the program's content and activities.

The course was made possible thanks to the Organization for Specialized Education for the Prevention, Rescue and Fire Fighting Service in Civil Airports (OE-SESCINC). Thirteen military firefighters of the Porto Alegre Airport Platoon of the 1st Military Fire Battalion and one rescue and fire fighting supervisor of the Fortaleza airport, in Ceará, were certified.

Among the objectives of this initiative is the development of airport firefighters' leadership skills and tasks in aeronautical and non-aeronautical emergencies at airports.

Fraport Brasil - Porto Alegre is a pioneer in the provision of this specialized training program among airports managed by private companies in Brazil and can now serve the demand for this type of professional training.
